About Me

I am a senior undergraduate student in Electrical Engineering at KAIST and a current research intern at S-Lab (MMLab), NTU, working under Prof. Ziwei Liu. My research interests lie in **egocentric vision**, **embodied AI**, and **3D/4D vision**, with a focus on long-horizon activity understanding, tool-use reasoning, and state-aware interaction. I am particularly interested in building intelligent systems that connect visual perception with action and physical reasoning in real-world environments.
